JUNIOR SOFTWARE DEVELOPER

PYTHON | AGILE TRAINED | ANALYTICAL

- Results-oriented student of Software Engineering Technology - Artificial Intelligence with applied project experience in software development, database management, web development, and DevOps/TechOps
- Foundational understanding of AI, including machine learning concepts, search algorithms and data structures
- Knowledgeable of requirements analysis, agile practices, user-oriented design and the SDLC
- Skilled in problem solving issues, technical troubleshooting and debugging
- Highly adaptable with proven collaboration & communication skills honed through customer service experience

TECHNICAL SKILLS

Programming:	Python, C#, Java, JavaScript
Web Development:	HTML/CSS, React, Node.js, Express.js, REST APIs, CRUD
Database Management:	SQL, MongoDB, Relational Databases, Database Design
Operating Systems & DevOps:	Linux (RedHat/Ubuntu), Windows, CLI, Shell Scripting, AWS, Ansible, Docker
Software Engineering:	OOP, SDLC, UML, Agile, Testing & Debugging, DevOps, TechOps
Development Tools:	Git/GitHub, Visual Studio Code, Eclipse, IntelliJ IDEA
Other Tools:	MS Visio, Jira, MS Office, Figma, Adobe Creative Cloud

EDUCATION

Software Engineering Technology - Artificial Intelligence Advanced Diploma — Sept. 2025 - Present

Centennial College, Toronto, ON — *GPA: 4.157/4.5(A)*

Courses: Python Programming | Web Interface Design (HTML/CSS) | Unix/Linux OS | Web Application Development C# Programming | Introduction to Database (SQL) | Client-Side Web Development | Java Programming | AI Systems Design | Software Requirements Engineering | Software Engineering Fundamentals

Diploma in Information Technology — Graduated Nov. 2024

SIBA Campus (UGC Approved), Kandy, Sri Lanka — *GPA: 4/4 (A)*

Courses: Computer Application Development - C# | Web Site Designing & Development | Java Programming | Introduction to Python Programming | Computer 2D Animation

ACADEMIC PROJECTS

Web Interface Design - HTML/CSS

- Designed a responsive Natural Disasters website, covering different types of natural disasters and providing information and how to prepare for it
- User-friendly website layout with structured navigation, visual content and responsive design

Software Engineering Requirements - *CatchaPath* (Post-Secondary Search Application)

- Collaborated with a team to analyze and design a college/university recommendation system that helps students to receive career path suggestions, details about the college/university, search scholarships and multilingual decision support with an AI chatbot
- Applied UML modeling, detailed class diagrams, developed complete use-case specifications, state diagrams for dynamic classes and a complete SRS document

Introduction to Database (SQL) - Fitness Database

- Served as the Project Lead in identifying system requirements and designing a complete ER diagram for a fitness database covering Customers, Memberships, Equipment, Locations, Employees, and Payment options details
- Developed a relational SQL Database implementing Create, Read, Update and Delete (CRUD) operations for customer data and related entities

PROFESSIONAL DEVELOPMENT

DevOps - TechOps Certification | Institute of Digital Engineering Technology (Remote) — May. 2026 - Sept. 2026
